Invitation: Join the IICKC Trade Delegation to SEMICON EUROPA & productronica 2025 (Munich, Nov 18-21)

 **Dates:** November 18–21, 2025

 **Venue:** Messe München, Munich, Germany

 SEMICON Europa info: expo.semi.org/europa2025 (also see “enter” page)

 productronica overview: productronica.com (benefits, themes)

We are excited to extend an exclusive invitation to Indian SMEs in the Semiconductor / Electronics / Electronics manufacturing ecosystem to join the **IICKC (India-International Knowledge & Commerce Council)** delegation to these twin flagship events.

Why attend **SEMICON EUROPA + productronica** together?

Because in 2025, they are **co-located**, creating Europe’s strongest single event for electronics manufacturing. This gives you a unique chance to engage end-to-end across the semiconductor and electronics production value chain under one roof.

Key highlights & advantages:

Highlight / Feature	Why It Matters / What You Gain
SEMICON Europa’s focused programs	Gain access to Executive Forums, Advanced Packaging Forum, Fab Management Forums, and high-level conferences that cover smart manufacturing, sustainability, mobility, medtech, and workforce trends.
productronica’s full electronics manufacturing footprint	Walk through PCB/EMS, SMT, semiconductors, cables & hybrids, future markets, production support — everything under one expo.
Large international exposure	In past editions, productronica drew ~1,400 exhibitors, 42,000 trade visitors from 94+ countries; 58% international visitors; 54% exhibitors abroad.
High decision-making audience	Many visitors are in procurement / senior management roles, making on-the-spot partnership or purchase decisions.
One-stop cross-domain networking	Because the events overlap, you can interact with equipment makers, materials suppliers, assembly solution providers, automation/robotics firms, software & analytics players, research institutes, etc.
Trend insight & visibility	Stay ahead by hearing world premieres, trend forecasts, cutting-edge demos, live showcases of advanced packaging, microelectronics, secure microelectronics, and power electronics.

Highlight / Feature	Why It Matters / What You Gain
Better ROI via delegation scale	With IICKC's coordination, you get economies of scale in travel, branding, coordination, networking, collective buyer / partner introductions, and logistical support.

Benefits of being in the IICKC Delegation

- **Group leverage & visibility:** As part of India's delegation, you gain collective branding (India pavilion, group visibility) which attracts more footfalls and credibility.
 - **Pre-arranged B2B matchmaking:** IICKC will help with scheduling targeted one-to-one meetings with European OEMs, Tier-1s, equipment makers, research partners, prospective clients and investors.
 - **Logistical support:** Assistance with visas, travel coordination, local transportation, on-ground support, translation (if needed), booth sharing or partial booth sharing options.
 - **Market intelligence & guided tours:** Delegation members can benefit from guided tours, curated insights, and briefings on technology trends, European market entry strategies, and regulatory / standards landscape.
 - **Peer networking & collaboration:** Meet other Indian SMEs, exchange learnings, explore joint ventures among Indian companies for international scale.
 - **Cost efficiencies:** Shared costs for booth infrastructure, travel packages, bulk discounts, shared collateral, etc.
-

Why this matters for Indian Semiconductor/Electronics SMEs

1. **Accelerating global integration**
By being on-ground in Europe at the heart of semiconductor & electronics manufacturing, Indian firms can fast-track collaborations with global OEMs, equipment vendors, design houses, and research institutions.
2. **Showcase "Made in India" capabilities**
Indian SMEs get a chance to display their semiconductor/electronics products, modules, subsystems, processes, test services, packaging, and more to a global buyer base.
3. **Technology pick-up & upgradation**
Witnessing cutting-edge solutions, acquisitions, automation, AI/ML in manufacturing, advanced packaging, secure microelectronics, and sustainable processes helps Indian firms benchmark and adopt modern practices faster.
4. **Supply chain diversification & resilience**
In a world re-aligning supply chains, Indian players can position themselves as alternative/strategic partners for European companies looking for reliable, cost-effective, diversified sourcing.
5. **Learn global standards & compliance**
Exposure to European regulatory norms, standards (e.g., RoHS, REACH, environmental compliance), and best practices will help Indian firms build globally acceptable products.
6. **Access to investment, co-development & partnerships**
You may find potential investors, joint R&D partners, or collaborative offers (for fabs, test, packaging, modules) that accelerate your scale and roadmap.

7. Boost confidence for “Make in India / Atmanirbhar Bharat”

The experience, exposure, learnings, and networks gained will strengthen India’s semiconductor ecosystem. Over time, this contributes to India’s strategic aim of being a global semiconductor hub.

Let’s accelerate India’s presence in global semiconductor/electronics supply chains.

Interested? Contact **IICKC** now for registration, delegation packages, timeline & formalities.

Time is limited — get in early!
